

ALLERGONE[®]

Dust
Neutralising
Spray

ALLERGONE

Dust mite allergy is one of the most common allergies in pets. Normal insecticide sprays do not help as animals are allergic to proteins found on the bodies of and in the faeces of mites. Allergone is an innovative spray that neutralises the allergens of house-dust mites. It reduces exposure to house-dust allergens and helps to reduce skin reactions in animals sensitive to dust. It contains an aqueous suspension of microcapsules filled with a mixture of substances that alter the chemical structure of allergen particles to reduce the allergenicity of dust particles. It also binds dust particles together so more can be removed when cleaning.

Composition:

- **Hypromellose**
- **Poly (vinyl alcohol)**
- **Citric acid**
- **Isopropyl myristate**
- **Benzyl benzoate**
- **Colloidal silica**

Uses:

Spray directly onto objects that where house-dust are likely to be found, such as:

- **Rugs and carpets**
- **Bedding**
- **Mattresses**
- **Upholstered furniture**
- **Soft toys**
- **Curtains**
- **Horse rugs**

Allergone has been tested and safety approved in the EU.

How to use

- Remove covers on mattresses, duvets and pillows before spraying.
- Shake the container before use and press the handle three times to activate the spray.
- Spray from a distance of 30 cm.
- Move the bottle back and forth over the object as you spray, and spray all sides of the object.
- For a continuous spray, pump the handle in a smooth rhythm.
- Leave to dry for 1 hour and ventilate the room.
- Do not vacuum for 3 days after application.
- Washing objects will remove the spray, so re-spray them after washing.
