

Diagnosis of equine allergies

The diagnosis of atopy, insect bite hypersensitivity or equine asthma should be based on clinical history and by excluding other conditions with similar symptoms.

Diagnostics

Next Equine Serum Test

- Specially developed for horses
- Examines for the 32 most relevant allergens
- Uses a monoclonal antibody generated and selected from recombinant horse IgE (rIgE)
- High specificity and sensitivity due to latest technology
- Fast and reliable result
- 100% reliable screening
- Short-term medication does not have to be discontinued
- Clearly set out and easy to interpret
- Support with our veterinary allergy experts

Artuvetrin® Skin Test

- 80 individual allergens or mixtures available
- 3ml vials (enough for 60 tests): cost-effective
- Supplied within 8 working days
- Concentrations based on determination of threshold values for reliable results
- Performed directly in the skin (local reaction): immediate result

Treatment

Artuvetrin® Therapy

- Treats the root cause, not only the symptoms
- Effective, efficacy rate is 84%
- Identical allergens for allergy tests and therapies
- 10 months treatment with only one vial
- One vial, one concentration
- Only licensed therapy in Europe
- Delivery within 10 working days
- Easy to use
- Safe

Pet's Relief®

DERM-10

DERM-10 is a smooth wound cream containing powerful wound healing agents for a rapid recovery of all kinds of non-penetrating or superficial wounds.

It contains Zinc Oxide, Centella asiatica, Echinacea purpurea, Calendula officinalis, Hamamelis virginiana, Melaleuca viridiflora, Thuja occidentalis, Lavandula angustifolia, Salvia lavandulifolia, Arnica montana.

ALLERGONE

Innovative solution for neutralisation of house dust allergens. Reduces the exposure to house dust allergens, which helps to reduce the allergic symptoms.

ALLERGONE spray contains an aqueous suspension of microcapsules. The core of microcapsules is filled with a mixture of substances affecting the chemical structure of allergens particles.

ALLERGONE forms a polymer film that glues dust allergens in larger particles stopping them from floating in the air and allowing aggregated allergens to be removed easily with conventional cleaning.

Long-term protection against house dust mites – 5 months after a single application.
